

OVERVIEW OF CORRUPTION – A CITIZEN SCORECARD

The anti-corruption performance of the government and the country's corruption risks are rated by citizens as:

- Negative/High risk
- Mediocre/Medium risk
- Positive/Low risk

This infographic summarises the country results for five key corruption questions presented in this report. For each question, countries are categorised as either red, amber or green depending on how positively or negatively respondents from that country responded. Countries are ordered from those who score the best according to their citizens to those who score the worst. See the methodology note for the full description of how the colours are assigned.

These groupings are meant to be indicative, and regionally contextual. It is important to keep in mind that they are based on the subjective perceptions and experiences of citizens in each country rather than on an assessment against a common objective benchmark. * is used where there was high levels of don't know responses or when the question was not asked in that country.
